

6 August 1974

MEMORANDUM FOR: OMS BSSC

SUBJECT : [REDACTED] Objective

25X1A

25X1A

As requested at the 31 July meeting of the OMS [REDACTED] the following comments are submitted on the three indicated sub-parts of the [REDACTED] objective for FY 1975.

(1) Examination of impact of technology -- even limited to computers -- seems to be a too general proposal to be a feasible objective for the OMS. Moreover, it would seem that there must already be much in management literature on this topic, dating back at least to the Industrial Revolution.

(2) The proposal concerning problems in accepting minorities, as stated, seems to assume that there will be problems. DCI has said that there will be no problems, and the Agency's EEO program is based on this assumption. This proposed sub-part would therefore seem inappropriate.

(5) Proposal for special screening of candidates for senior positions would be just as appropriate as special screening for custodians of funds, however unlikely politically.
